

Rigid PVC Pressure Pipe **PPCZL- 1003A**

Product introduction

PPCZ-1003A contains the right amount of complex antioxidant system and other functional polymer additive, which can significantly increase finished goods' performance. It provides excellent heat stability and processing performance to produce pipes with high efficiency and enhance physical properties. This stabilizer has been designed for twin screw extruders and large high pressure pipes.

Chemical and physical specification	
Particle size	%95.00
Specific gravity	2.00 to 2.30
Mixed metal content	27.00 to 34.00
Bulk density	650±10 g/l
Moisture content	%1 Max
Soft point °C or MP	100°C
Temperature at %1 weight loss	290°C
Temperature at %10 weight loss	355°C

Application

This product mainly used in Rigid PVC pipes, including

- Pressure pipe
- Water supply pipe

Package: 25±1 KG PP bag

Storage: Stored in dry place and avoid high temperature, keep away from Sulfides

Form: Flake

Color: white
