

PVC Ceiling, Wall cover, curtain rod **PFCZ- 3003A**

Product introduction

PFCZ-3003A has high thermal stability.

Suitable for all type of extruders and screws: suitable for high filler loading.

Easy to disperse and suitable for both mechanical and pneumatic feeding.

Optimal balance of internal and external lubrication,

long remaining time in the extruder,

Avoiding problems of burnt surface or appearance of deposits.

Chemical and physical specification	
Particle size	95.00
Specific gravity	2.00 to 2.30
Mixed metal content	27.00 to 34.00
Bulk density	650±10 g/l
Moisture content	1% Max
Soft point °C or MP	100°C
Melting range	
Temperature at %1 weight loss	290°C
Temperature at %10 weight loss	355°C

Application

This product mainly used in Rigid PVC pipes, including

-ceiling

-wall covering

-flooring

-Liners for swimming pools

Package: 25±1 KG PP bag

Storage: Stored in dry place and avoid high temperature, keep away from Sulfides

Form: Flake

Color: white
