TECHNICAL DATA SHEET

- PRODUCT** : Plasticizer for producing PVC
- GRADE** : IRLUB SP – 762A
- PACKING** : 25 kgs and 175 kgs. Barrels
- TYPICAL USE** : Depending on the application, it may vary from 0.1 – 1.0 phr in PVC and from 1.0 – 6.0 parts in rubber.

SPECIFICATION

Appearance	: Paste (dough)- Colorless
Density	: 0.82 gr / cc
Viscosity @ 130 °C	: 450 – 600 cpc
Melting Point (°C)	: 55 – 60 °C

APPLICATION

The above product is produced based on a newest formula in the world and based on the international standards. It serves as a highly effective external & internal lubricant for PVC. It is effective looser and lubricant and it's usage decrease adhesive in machine and mold. It works as regulator for rubber since it is compatible with rubber. Probably it is Superior to it's similar material.

Consumption ration of this material has direct relevance with quantity and amount of consumable CaCo3.
