TECHNICAL DATA SHEET

- PRODUCT** : Lead Based Complex Stabilizer for PVC windows & doors Profile
- GRADE** : IRSTAB PFL – 301A
- PACKING** : 25 kgs net multiwall plastic bags
- TYPICAL USE** : Depending on the formulation, processing condition and the type of products, it varies in the range of 2.0 – 4.0 phr.

SPECIFICATION

Appearance	: Off White Flake
Particle Size (%)	: 95.00
Specific Gravity	: 2.00 to 2.30
Mixed Metal Content (%)	: 27.00 to 34.00
Bulk Density	: 650 ± 10 g/l
Moisture Content (%)	: 1% Max.
Soft. Point (°C) or MP	: 100 ° C

APPLICATION

The above product is an excellent cost performance stabilizer and is suitable where long period of heat stability is required. It is produced based on a newest formula in the world and based on the international standards. It has excellent internal & external lubrication and can be applied for high speed extrusion and high temperature production. It imparts good heat stability and high gloss to the finished products. Impact modifier may be added, if necessary.
